

MULTIBECK - LONG VERSION

LONG VERSION

Specifically designed to take larger birds from start to finish, the long version Multibeck really comes into its own during the finishing phase.

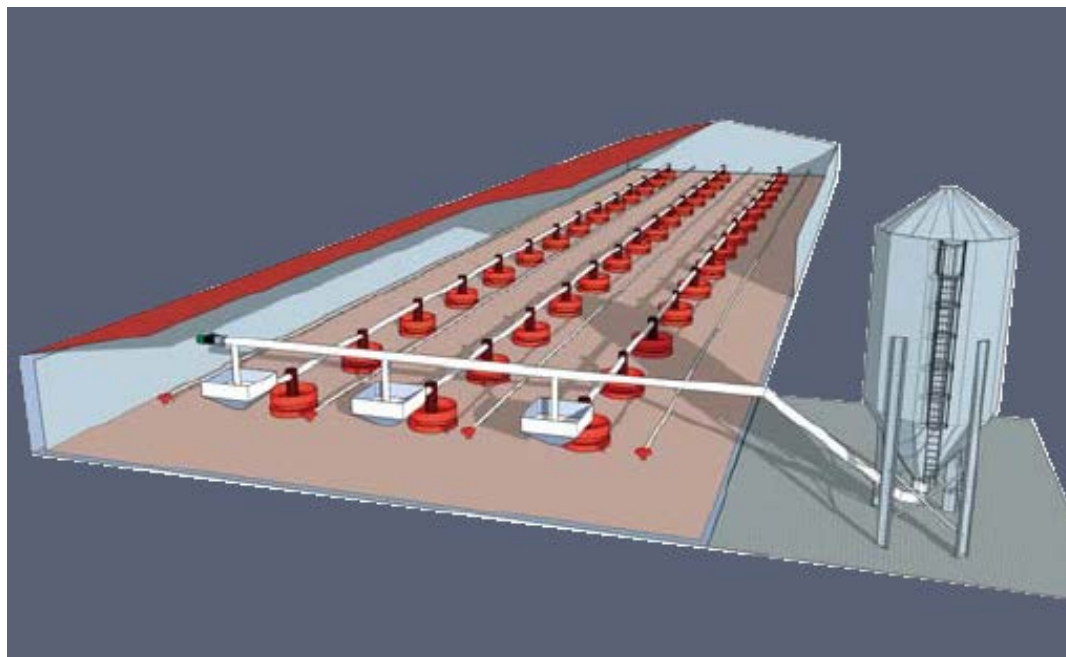

The unique long flexible drop tube ensures that the feed pan is free to move when struck. This is especially useful for finishing large birds e.g. turkeys as it greatly reduces the chance of bruising.

A cover can be fitted to prevent the birds accessing the upper pan and a collar (shown) can be fitted to prevent waste.

Both the cover and collar can be fitted and removed whilst the pan is in situ on the feed tube.

FEED DISTRIBUTION

Tube material	Galvanised steel
Tube o/d	45mm
Feed quantity	600g per m of tube
Motor power	0.55kW, 50Hz, single or three phase
Feed delivery	450kg per hour
Max line length	140m / 460ft
Hanging points	Every 3m
Average height	3.25m
Installation time (3 fitters)	Approx. 100m / day
